

When you can't go anywhere without one.

People over the world are dealing with the distressing effects of overactive bladder — just like you.

The symptoms can include:

- strong, sudden urges to urinate
- the need to urinate frequently
- repeated wetting episodes

We are conducting a research study of a study medication for overactive bladder. If you take part in this study, we will ask you to attend three clinic visits and two telephone visits over a 14 week period. You will also receive study medication or placebo (an inactive substance) and study-related medical care at no cost. You may also be compensated for time and travel.
